

TYPHOON

A Family of Naval Stabilized and Remotely Operated Weapon Systems

TYPHOON, RAFAEL's industry-leading family of naval stabilized weapon systems, has it all: light weight, high accuracy, simple operation and lethal firepower at cost-effective prices.

Featuring:

- High hit and kill probability
- Day and night operation
- Stabilized and highly accurate
- Remote and local operation
- Built-in Fire Control Computer
- Simple operation with high reliability
- No deck penetration
- Lightweight and compact
- Low maintenance costs
- Embedded training capability

Weapon of choice for leading navies worldwide.
Selected by the U.S. Navy for shipboard defense.

THE TYPHOON FAMILY

A FULL RANGE OF WEAPONS, ON A WIDE VARIETY OF VESSELS

TYPHOON is based on a lightweight, highly accurate, stabilized pedestal which can accommodate a variety of weapons for a wide spectrum of missions. TYPHOON is easily integrated on new or existing platforms and integrated with other on-board systems. No deck penetration or special adjustments are required. TYPHOON may be operated independently, using an on-mount sight, or it can be slaved to an Electro-Optical Detector (EOD) or Fire Control Radar (FCR). TYPHOON provides fully independent fire control computations with no need for external systems. It is designed for autonomous operation or as an integral part of the combat system.

The TYPHOON family includes:

TYPHOON MK38 MODE 2*

An excellent solution for lethal fire power at maximum ranges for small and medium caliber guns (up to 30 mm).

MINI TYPHOON-ROSAM**

A lightweight stabilized and remotely operated machine-gun system, specially designed for fast maneuvering boats (7.62mm, 0.5", 40mm grenade launcher)

TYPHOON SSM

A powerful combination of Gun and surface-to-surface missiles yields a cost-effective operational solution.

* MK38 Mode 2 is a TYPHOON version for the U.S. Navy, Provided through teaming with United Defense.

** The ROSAM is a MINI TYPHOON version for the U.S. Navy.
